Porto Alegre, RS - Brazil

PROFESSIONAL SUMMARY

Senior Front End Developer with 10+ years building React/TypeScript applications for global products (Deel, Indeed, Petco, Alamo). I bridge tech and business teams to ship accessible, fast, and reliable user interfaces — with accessibility, usability, and web performance as core pillars. Experienced working across distributed, async, multi-continent teams, and mentoring developers along the way. I integrate AI features into production web apps — from streaming chat interfaces and tool-calling agents to RAG pipelines and AI-assisted developer workflows — and I build full-stack products end to end as a solo developer.

CORE COMPETENCIES

React & TypeScript | Web Accessibility | Web Performance / Web Vitals | Design Systems | State Management (Redux / Context / React Query) | Next.js & SEO | LLM Integration (OpenAI / Gemini) | Mentoring & Distributed Teams

WORK EXPERIENCE

Deel

08/2025 - Present

Web Front End Developer

Remote

- FrontEnd web development for payroll payments platform focused on Professional Employer Organization and US organization registrations. Tech stack based on React with internal design system with React Query, Tanstack libraries and MUI. Working with team location ranging from NA/LATAM to Europe and Asia.

Indeed

04/2025 - 08/2025

Senior Web Front End Developer

Remote

- FrontEnd web development for job search platform with emphasis on accessibility for maintenance and new features in a TypeScript code base using React. Majority of the team located in Latin America with other squads being from both Latin and North Americas.

Adaptive Build

05/2024 - 01/2025

Senior Web Front End Developer

Remote

- FrontEnd web development for financial SaaS platform focused in real estate and construction companies. Daily work with TypeScript code base using React with Redux and Context for state management. Interacted remotely with colleagues from USA and Brazil and final users in USA, being responsible for maintaining current features and implementation of new ones like digital Lien Waivers and interfaces for data propagation between multiple objects with user options and custom flows. Also contributed to the Django back end.

Everest ERP

01/2022 - 05/2024

Senior Web Front End Developer

Remote

- FrontEnd web development for an ERP framework built by back end driven templates using React components with proprietary network technology based on GraphQL. Working remote with teams located in Germany, USA, Vietnam and Brazil. Responsible for supporting the

center of the ERP for everything from the financial to the accounting flow, developers support, performance, usability and design system maintenance.

Oowlish / Petco

07/2021 - 12/2021

Senior Web Front End Developer

Remote

- FrontEnd web development for PETCO e-commerce website in a NextJS/React architecture supporting the business team with enhancements and new features like new payment methods. Remote team with multiple timezones working asynchronously while helping new developers to ramp up in the project.

Triider

02/2021 - 06/2021

Senior Web Front End Developer

Remote

- FrontEnd web development focused on SEO and website performance for Web Vitals. Major project related to converting old legacy website from HandlebarsJS and LESS to React with NextJS and LESS styling, increasing the project overflow and moving all web vitals from red to green in 1.5 months.

IWS Isobar Brazil

10/2018 - 01/2021

Senior Web Front End Developer

Remote

- FrontEnd web development, mainly for Enterprise and Alamo Rent a Car websites. Heavy use of multiple backends/APIs like Adobe AEM, .NET, SiteCore and Drupal PHP with majority of the projects using React with Redux with focus on usability and accessibility. From small local teams to international multi-continent teams but always working with the local IWS environment to help and mentor new talents, colleagues and interns.

Bode.io

05/2016 - 10/2018

Web Front End Developer

Remote

- FrontEnd web development for multiple platforms, such as learning platforms, CRM, e-commerce, corporate websites, landing pages and others. High use of SASS and JavaScript on mostly Python environments, including back-end work in Django. Main role of developing FrontEnd for all projects including optimization for faster MVPs and kick-offs. Projects included Muambator, a tracker for Brazilian shoppers' international purchases (Django, Python, SASS, Bootstrap), where I rebuilt the tracking interface as a faster, mobile-first experience.

ITS System

12/2014 - 12/2015

Quality Analyst

Remote

- Quality assurance for financial applications at Banco Topázio (Brazilian bank) and Topázio Cartões (Credit Concession and Credit Card issuer). Led the QA team to improve the processes, connect more with the development team, implant new tools/methodologies and other deliverables.

Stefanini / Dell Team

08/2012 - 04/2014

Quality Analyst Assistant

Remote

- Quality analysis for multiple Dell Computers applications, mainly for Financial, Insurance, Security Systems and POS mechanisms. Also worked in mentoring new trainees to Dell's processes and QA methodologies.

Ação Informatica / GIS Solutions

04/2008 - 04/2012

Project Manager - POC

Remote

- Internal project management for proof of concept of Geographical Information Systems projects using iSmart framework tool with Oracle Spatial. Also acted as support for Technicians within IBM Hardware maintenance and new implementations.

PROJECTS

casTyou Sole developer

Casting marketplace connecting creative talent (actors, musicians, dancers, models) with producers and agencies across film, TV, theater and digital content. "Casting Made Smart" — create your profile, match, get cast. Built from scratch as the only developer: architecture, back-end API, user roles (talent, producers, agencies, pet owners, parents of minors), AI-powered matching, ChatGPT integration (AI-generated casting-call flyers), Open Graph/social-media sharing, swipe-based matching, direct messaging, talent search with production-grade filters, shortlists, and the "CasTars" community bounty system. Now in open beta.

React, Next.js, TypeScript, Tailwind, React Native, OpenAI (ChatGPT) API

Lupah Imóveis Freelance full-stack

Real-estate platform for a Curitiba agency (buy, sell, rent, property management). Built front end, back end and API; strong focus on SEO, a conversion-focused listing experience, and integration with external property marketplaces. Built using Claude Code.

Next.js, TypeScript, Tailwind

ORA Objetos Reais para Archicad

Digital library of professionally modeled 3D objects for Archicad based on real Brazilian furniture brands, with free registration and per-object downloads. Built back end and front end in Django, focused on SEO, usability and integration with subscription services.

Django, Python

DM Bard Personal

Music player built for tabletop RPG tables to play ambient music and soundscapes during sessions.

React

RPG Session Teller Personal

Turns messy bullet-point session notes into immersive, fantasy-style narrative text for Dungeon Masters and players.

React, Vite, Tailwind, Gemini API

Movie Matcher Personal

"Find your film by feel." Turns a mood or suggestion into movie recommendations and matches preferences across multiple people in real time, powered by the Gemini API. Source: https://github.com/tiago-sch/movie-matcher

React, TypeScript, Vite, Tailwind, Gemini API

SKILLS

Front End: HTML / CSS / Optimization, Javascript / Typescript (React), Context / Redux / Recoil

Back End: Python (Django/Flask) — REST APIs, auth/user roles, subscription integrations, PHP (Laravel), Node.js, REST / GraphQL, Next.js API routes / Open Graph

AI: LLM integration in production apps: OpenAI (ChatGPT) API, Gemini API — streaming chat, tool-calling agents, RAG pipelines, AI-assisted development: Claude Code as daily driver for the full workflow (design, implementation, refactoring, tests), Fluent across Claude, ChatGPT, Gemini and Akai

Other Skills: Team Leadership / Management, Web Accessibility, CI / Vite / Webpack **Languages:** Portuguese (Native), English (Fluent)
